

Bluechip 4.1 Release Notes

The following information outlines the enhancements, modifications and fixes contained in Bluechip 4.1.

This is a full update; Bluechip 4.1 can be installed over v3.19 or later. After successful installation of this update, you will see the version number displayed in Bluechip's title bar, as "Bluechip 4.1".

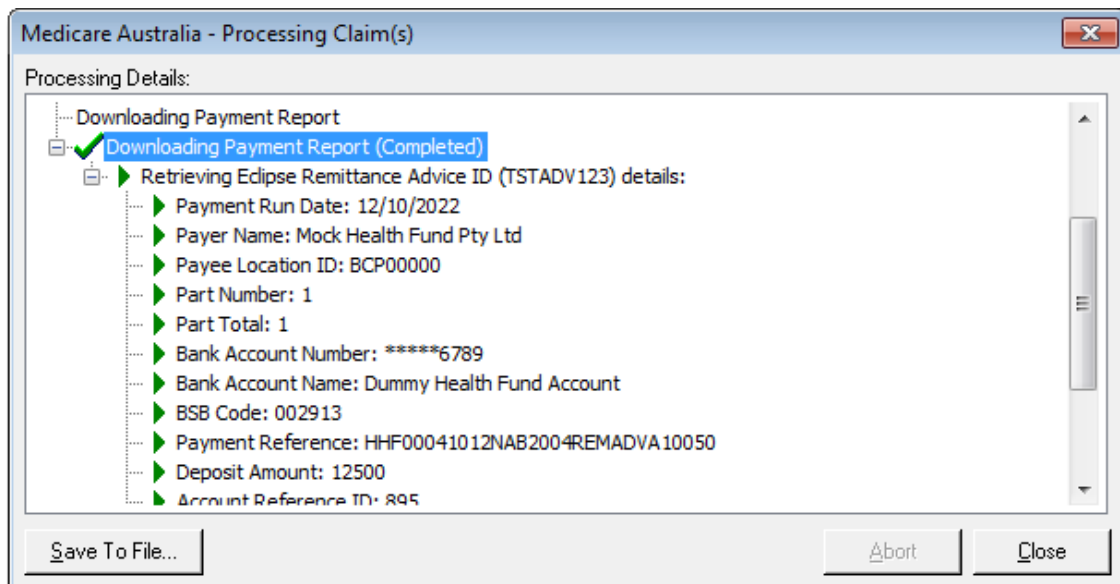

Bluechip and Medicare Web Services

MedicalDirector Bluechip 4.1 is focused on the transition to Medicare Web Services technology. Find out more about the benefits of Medicare Web Services [here](#)

Bluechip 4.1 automatically integrates your PRODA device with Medicare Web Services, so no manual configuration is required. To find out more about this, see the article [."How to skip manual PRODA authentication"](#).

What's New in Bluechip 4.1?

The Medicare Processing Screen provides more-detailed logging.

The IHC In Hospital Claim Results window now includes the Patient's Fund Status and Claim Assessment details.

Paid items

Date	Item	Claim Amount	Already Paid	Outstanding Bal.	Benefit Paid
12/10/2022	32224	500.00	350.00	150.00	1.30

The In Hospital Claiming (IHC) request screen has 5 new fields:

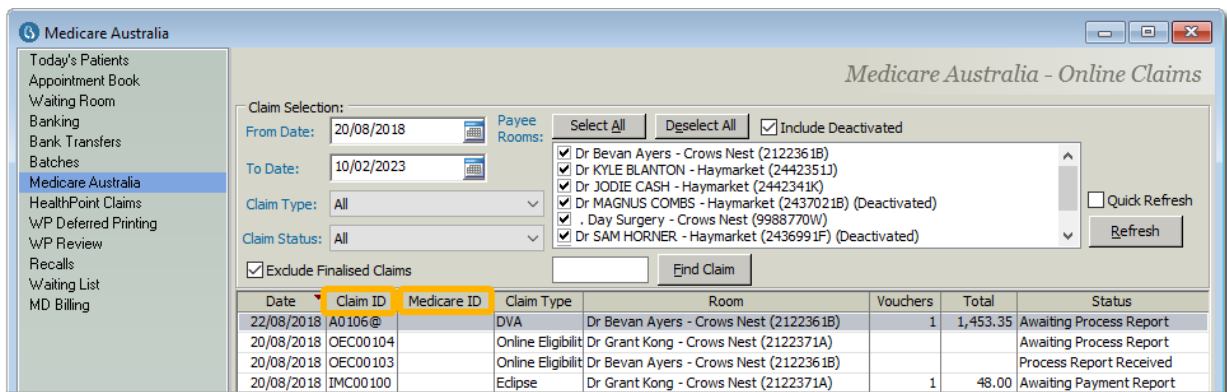

- Mandatory (bold with an asterisk*):
 - CareType
 - IcdVersion
- Optional:
 - InterHospitalContractStatus
 - UnplannedReturnTheatre
 - UnplannedAdmissionICU

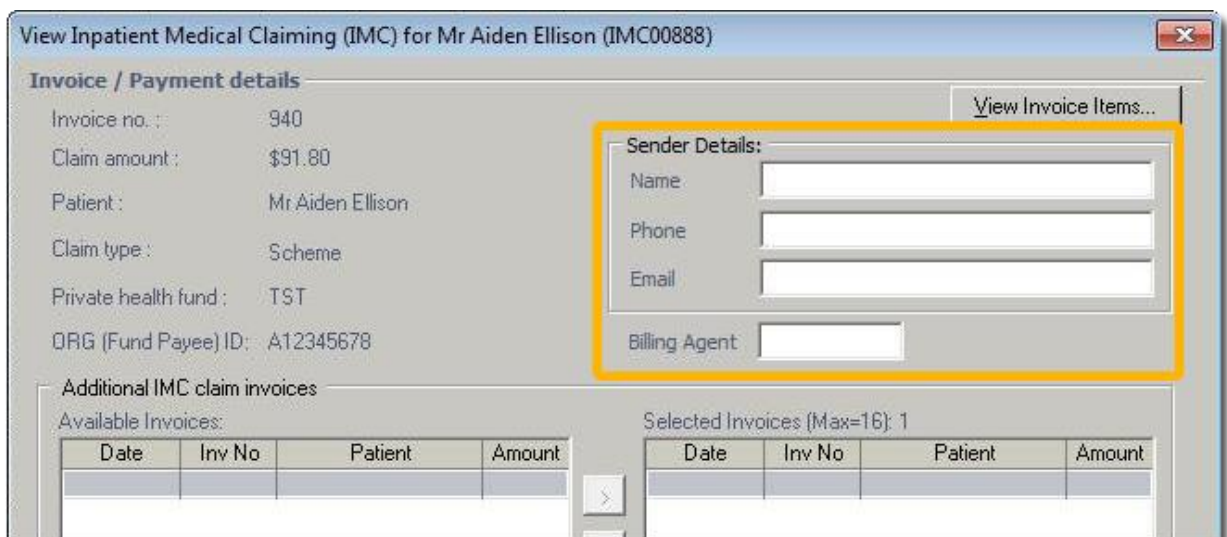

The Medicare Australia window now includes a Medicare ID column.

Medicare IDs differ from the local Claim IDs stored in Bluechip:

- Medicare identifies claims using the Medicare ID. *This ID may be required if you need to contact Services Australia.*
- Bluechip utilises the local Claim ID. *This ID may be required if you contact MedicalDirector Customer Support.*

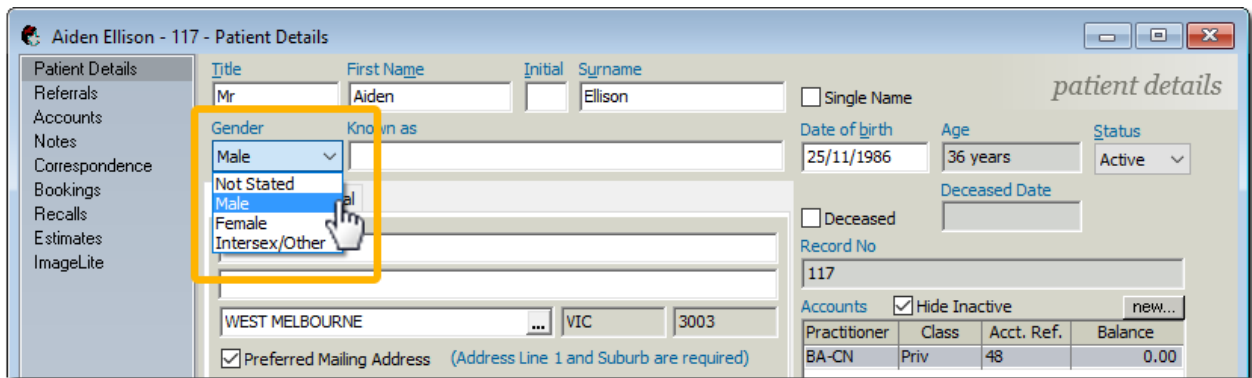

The IMC Submission window now allows entering of the optional Sender Details and Billing Agent, similar to the functionality already available for IHC In Hospital Claiming and Online Eligibility Check Submissions.

There are now 4 options for recording a patient's Gender:

- Not Stated
- Male
- Female
- Intersex/Other
